

PVC WATERSTOP

- PVC water stop tapes are used in walls, reinforced concrete walls, and foundations
- They are used in cold joints.
- They have high flexural strength and elasticity.
- They are resistant to high water pressure.
- Joint locations are joined by the thermal fusion method.

AREAS OF USAGE

- Hydraulic Structures
- Underground Structures
- Tunnels, Bridges, and Viaducts
- Retaining Walls and Waterways
- Basement Concrete Walls and Foundations
- Water Treatment Facilities
- Swimming Pools and Ornamental Ponds
- Water Tanks

Product Information	Width (a)	Weight (kg/m)	Thickness (t)	Anchor High (f)	Product Length	Elongation Gap (k)	Colour
ECO A Ürün	240 mm	2,085 kg/m	4 mm	15 ≥ 3t	80	20 m	Yellow

PHYSICAL PARAMETERS

Analysis	Unit	Result
Hardness	SHORE A	75
Tensile Strength	MPa	7
Breaking Strain	%	225

In economic formulas, dimensions may have a tolerance of $\pm 10\%$.
